measurement that works

catering thermometers

Selecting the correct thermometer for a food and catering application is, by definition, very important to achieve the maximum accuracy and repeatability of the temperature.

The selection criteria for a digital thermometer should include:

- measurement range
- resolution of the reading 1°C, 0.1°C or 0.01°C
- desired accuracy
- response time

ETI offers a range of catering thermometers and accessories that are ideal for busy restaurants, cafes, bars etc. where food safety is essential.

fridge & freezer temperatures

Keeping fridges and freezers at the correct temperature is critical to ensure good food safety during storage.

Food should be stored in a fridge at a minimum of +4°C but this is only safe for short periods. It is better to store food in a fridge at +2°C.

Food stored in a freezer should be regularly rotated and stored at between -18 and -22°C as bacteria will not grow at these temperatures.

safe food temperatures

To prevent food poisoning, it is essential to kill bacteria. Most bacteria are killed quickly at between +75 to +100°C. The danger zone is between +5 to +70°C where bacteria will grow rapidly. Therefore it is important when microwaving food that there are no cold spots in the food, likewise when reheating food or sauces that the food is reheated above +75°C.

All the above temperatures are a guideline only.

ThermaCheck

thermistor thermometer

- ✓ high system accuracy $\pm 0.4^{\circ}\text{C}$
- ✓ case includes Biomaster anti-bacterial additive
- ✓ temperature range -39.9 to $+109.9^{\circ}\text{C}$
- ✓ supplied complete with a penetration probe

The ThermaCheck hand held thermistor thermometer has been specifically designed for use in the food processing and catering industries to cope with routine day-to-day usage.

The ThermaCheck measures temperature over the range of -39.9 to $+109.9^{\circ}\text{C}$ with a resolution of 0.1°C and a high system accuracy of $\pm 0.4^{\circ}\text{C}$ (-10 to $+70^{\circ}\text{C}$).

The ABS case includes "Biomaster" additive that reduces bacterial growth. The instrument features a large, easy to read, LCD display with open circuit and low battery indication. The ThermaCheck is powered by a 9 volt PP3 battery which gives the thermometer approximately 100 hours continuous use. The unit incorporates an auto-power off facility which maximises battery life, turning the instrument off automatically after five minutes.

The ThermaCheck thermometer is supplied complete with a permanently attached, general purpose, food penetration probe with a 130mm stainless steel stem and a one metre coiled PU lead.

optional accessories

The protective PVC boot helps to protect the instrument against accidental damage. The black acrylic wall bracket stores the instrument safely (screws not supplied).

specification	ThermaCheck
range	-39.9 to $+109.9^{\circ}\text{C}$
resolution	0.1°C
accuracy	$\pm 0.4^{\circ}\text{C}$ (-10 to $+70^{\circ}\text{C}$)
battery	9 volt PP3
battery life	100 hours
sensor type	thermistor
display	12.7mm LCD
dimensions	36 x 80 x 147mm
weight	240 grams

a traceable certificate of calibration is included with each instrument

What is Biomaster? - Biomaster additives are powerful broad-spectrum inorganic, silver-based biocides for use in plastics, helping to reduce hygiene risks. The concentration of silver, in the patented anti-microbial active agent in Biomaster, provides a release of silver ions on demand, which in turn safely inhibits microbial growth.

Food Check 2 & 5 thermometers

- ✓ two models available 0.1°C or 1°C resolution
- ✓ case includes Biomaster anti-bacterial additive
- ✓ designed for the professional caterer
- ✓ supplied complete with penetration probe

The Food Check digital thermometers are designed specifically for use in the food and catering industry. The Food Check thermometers are ideal for measuring the temperature quickly and accurately, when monitoring cooked and chilled foods as part of HACCP and health and safety procedures.

The ABS case includes "Biomaster" additive that reduces bacterial growth. The instrument features a large, easy to read, LCD display with open circuit and low battery indication. The thermometer incorporates a simple to use on/off switch and is powered by a 9 volt PP3 battery that gives 200 hours continuous use.

The Food Check 2 measures temperature over the range of -49.9 to +149.9°C with a resolution of 0.1°C and the Food Check 5 measures temperature over the range of -30 to +300°C with a resolution of 1°C.

Each Food Check thermometer is supplied with a permanently attached food penetration probe with 130mm pointed stainless steel stem and 500mm PVC connecting lead.

optional accessories

The protective PVC boot helps to protect the instrument against accidental damage. The black acrylic wall bracket stores the instrument safely (screws not supplied).

Thermapen™ 1 & 5 thermometers

- ✓ one-handed operation
- ✓ lightweight, compact & easy to use
- ✓ foldaway stainless steel probe
- ✓ auto-power on/off facility

The Thermapen thermometers are designed for reliability and ease of use. The thermometers incorporate a clear digital display with a precise read-out of temperature over the range of -49.9 to +199.9°C or -50 to +300°C and a 0.1°C or 1°C resolution. Both low battery and open circuit indication are also displayed, when applicable.

The Thermapen is lightweight, at less than 100 grams including battery and probe. The casing is manufactured from high impact ABS plastic designed to cope with routine day-to-day applications. The Thermapen thermometers incorporate a stainless steel penetration probe that conveniently folds back through 180 degrees into the side of the instrument when not in use, turning the instrument off. An auto-power on/off facility turns the instrument on when the probe is in use and automatically off after five minutes, maximising battery life.

colour-coded cases

The Thermapen 1 and 5 pocket-sized thermometers are available in a variety of colours. The colour-coded Thermapens can be part of your HACCP and due diligence procedures, being used for different food types or preparation areas, reducing the risk of cross-contamination.

- white bakery/dairy products
- yellow cooked meats
- green salad/fruit products
- red raw meat
- blue raw fish
- brown vegetable products

Thermapen™ 1 & 5

fast response thermometers

- ✓ guaranteed to reach the temperature in just four seconds
- ✓ over 50% faster response than traditional probes
- ✓ two models 0.1°C or 1°C resolution
- ✓ one-handed operation

The Fast Response (FR) Thermapen pocket thermometers are 'probably' the fastest reading contact thermometers on the market today. The true temperature of a product can be tested by the FR Thermapen in just four seconds.

The response time of any thermometer is dependant on many factors, the mass of the sensing tip, heat transfer and, most importantly, the state of the substance being measured. With both air and liquid, agitation is crucial to rapid response. The ETI calibration laboratory has tested the FR Thermapen in a stirred water bath with amazing results. Each FR Thermapen reached 100% of the test temperature in four seconds.

The FR Thermapen incorporates a clear digital display with a precise read-out of temperature over the range of -49.9 to +199.9°C or -50 to +300°C with a 0.1°C or 1°C resolution. Both low battery and open circuit indication are also displayed, when applicable. The Thermapen is powered by a 12 volt MN21 alkaline battery with a minimum life expectancy of 100 hours and is supplied with a detachable wrist strap, battery and instruction card.

optional Thermapen accessories

The protective wallet and zip pouch (pictured left), both with belt loops, help to protect instruments against accidental damage.

The black acrylic wall bracket (pictured right) stores the instrument safely (screws not supplied).

CaterTemp™ 2 & 5 thermometers

- ✓ two models available 0.1°C or 1°C resolution
- ✓ proven electronic circuitry & durability
- ✓ designed for the professional caterer
- ✓ supplied complete with penetration probe

The CaterTemp 2 and 5 professional digital thermometers are designed with the catering and food processing industry in mind. Housed in a robust ABS case, the CaterTemp thermometers are a combination of proven circuitry and durability.

The CaterTemp 2 measures temperature over the range of -49.9 to +199.9°C with a resolution of 0.1°C and the CaterTemp 5 over the range of -50 to +300°C with a resolution of 1°C.

Both instruments feature a bright, easy to read LCD, displaying open circuit and low battery indication, when applicable. The CaterTemp thermometers are powered by a 9 volt PP3 battery which gives the thermometers approximately 200 hours continuous use.

Each CaterTemp thermometer is supplied with a permanently attached food penetration probe with 130mm pointed stainless steel stem and one metre coiled PU lead.

CaterTemp™ Plus

waterproof thermometers

- ✓ waterproof case offering IP66/67 protection
- ✓ extruded aluminium case for superior durability
- ✓ rubber bumper seals for impact resistance
- ✓ supplied complete with food penetration probe

The CaterTemp Plus hand held thermometer is housed in a robust extruded aluminium waterproof case offering IP66/67 protection. The instrument incorporates the latest microprocessor technology with improved durability, designed for reliability and ease of use in day-to-day catering and food processing applications.

The CaterTemp Plus thermometer measures temperature over the range of -49.9 to +299.9°C with a 0.1°C resolution. The instrument features a large, easy to read, LCD display with open circuit and low battery indication. The unit is powered by a 9 volt PP3 battery which gives the thermometer approximately 5,000 hours continuous use.

The on/off button is conveniently located at the front of the instrument as is the display hold facility. The CaterTemp Plus thermometer incorporates a secure battery compartment with a waterproof cover.

Each CaterTemp Plus thermometer is supplied with a permanently attached, water resistant, hand held, food penetration probe with a Ø3.3 x 130mm stainless steel stem and one metre PU coiled lead. The probe is both strong and versatile and suitable for a variety of applications including liquids, semi-solids and granular materials.

colour-coded rubber bumper seals

The CaterTemp Plus thermometers are available with colour-coded rubber bumper seals, black, yellow, green, red or blue. The colour-coded seals help avoid cross-contamination.

optional accessories

The protective PVC boot helps to protect the instrument against accidental damage.

The wall bracket stores the instrument safely (screws not supplied).

Thermamite™ 1 & 5 thermometers

- ✓ compact & robust design
- ✓ two models 0.1°C or 1°C resolution
- ✓ accuracy, flexibility & ease of use
- ✓ range -49.9 to +199.9°C or -30 to +300°C

The Thermamite thermometers offer accuracy, flexibility and ease of use, coupled with the durability and reliability that is required by the food and catering industry in helping to meet today's food hygiene legislation.

Both the Thermamite 1 and 5 incorporate a clear LCD display with a precise read-out of temperature over the range of -49.9 to +199.9°C or -30 to +300°C and a 0.1°C or 1°C resolution. Low battery and open circuit indication are also displayed, when applicable.

Both instruments are powered by a 9 volt PP3 battery with a minimum life expectancy of up to 500 hours. Each thermometer is supplied with a permanently attached rigid pointed, stainless steel food penetration probe (Ø3.3 x 108mm) and 500mm connecting lead, battery and instruction card.

optional accessories

This protective PVC boot incorporates a worktop stand and probe holder. The boot helps to protect the instrument against accidental damage. The black acrylic wall bracket stores the instrument and probe safely (screws not supplied).

Thermamite™ 601 thermometer kit

- ✓ no wasted time waiting for temperature to stabilise
- ✓ temperature range -49.9 to +199.9°C
- ✓ option to use several remote probes
- ✓ takes both product & storage temperatures

The Thermamite 601 thermometer measures temperature over the range of -49.9 to +199.9°C with a 0.1°C resolution. Both low battery and open circuit indication are displayed, when applicable. The Thermamite 601 has the same specification as the Thermamite 1 thermometer (see opposite) with the added benefit of a detachable probe.

The Thermamite 601 thermometer is supplied as a kit and is the ideal solution for taking both product and storage temperatures. By utilising a number of remote probes it is possible to simply and quickly collect temperature measurements from a large number of remote probes strategically positioned in food storage appliances.

supplied as a complete kit

The Thermamite 601 thermometer kit contains a Thermamite 601 thermometer and two probes, a food penetration probe (Ø3.3 x 108mm) and a remote probe with self-adhesive attachment pads and compatible socket (additional remote probes can be purchased). Each probe is supplied with an integral 500mm connecting lead. Each kit is housed in a protective ABS carrying case and includes a temperature log book, a tub of 70 anti-bacterial probe wipes and a traceable certificate of calibration.

fridge/freezer remote probe

The remote probe and socket can be attached to each fridge/freezer or display cabinet using the self-adhesive pads provided, the remote probe being placed inside the appliance. When the temperature needs to be checked, simply plug the Thermamite 601 into the remote socket for an instant display of the temperature. No time is wasted waiting for the temperature to stabilise, therefore a number of chill cabinets and fridges can be monitored in minutes.

specification	Thermamite 601 kit

Therma 20

thermistor thermometer

- ✓ temperature range -39.9 to +109.9°C
- ✓ wide range of interchangeable probes
- ✓ high system accuracy $\pm 0.4^\circ\text{C}$
- ✓ case includes Biomaster anti-bacterial additive

The Therma 20 hand held thermistor thermometer has been specifically designed for use in the food processing and catering industries with HACCP, due diligence and health and safety procedures in mind.

The instrument displays temperature to 0.1°C over the range of -39.9 to $+109.9^\circ\text{C}$ with a high system accuracy of $\pm 0.4^\circ\text{C}$. The Therma 20 features a large, easy to read, LCD display with open circuit and low battery indication.

The ABS case includes "Biomaster" additive that reduces bacterial growth. The instrument incorporates an auto-power off facility that maximises battery life, turning the instrument off automatically after five minutes. The instrument is housed in a robust ABS case.

The Therma 20 thermometer incorporates an easy to use Lumberg screw-locking type connector, allowing a wide range of interchangeable probes to be used. ETI offers an extensive range of interchangeable thermistor probes, see opposite.

optional accessories

The protective PVC boot helps to protect the instrument against accidental damage. The black acrylic wall bracket stores the instrument safely (screws not supplied).

2000 series thermometers

- ✓ three models 0.1/1°C, 0.1°C or 1°C resolution
- ✓ range -49.9 to +1000°C
- ✓ versatile thermometers
- ✓ front-mounted thermocouple probe socket

The 2000 series of hand held digital thermometers measures temperature over the range of -49.9 to +1000°C with a 0.1°C or 1°C resolution.

The 2001 measures temperature over the range of -50 to +1000°C with a resolution of either 0.1°C or 1°C. The 2002 measures temperature with a resolution of 0.1°C over the entire measurement range of -49.9 to +199.9°C

and the 2003 measures temperature with a resolution of 1°C over the entire range of -50 to +1000°C.

The thermometers feature an easy to read, LCD display with °C, hold, open circuit and low battery indication. Each unit incorporates an auto-power off facility that automatically turns the instrument off after approximately three minutes, maximising battery life. Conveniently located is the front mounted thermocouple probe socket that allows a wide range of interchangeable thermocouple type K probes to be connected to the instrument. For full details of the thermocouple type K probes available, see opposite.

optional accessories

The protective PVC boot helps to protect the instrument against accidental damage. The clear polycarbonate wall bracket stores the instrument safely (screws not supplied).

MiniTherma™ K kit

thermocouple thermometer

- ✓ interchangeable type K thermocouple probes
- ✓ water resistant offering IP65 protection

The MiniTherma K thermometer is designed for versatility and ease of use. The instrument accepts a miniature type K thermocouple plug that enables a variety of interchangeable probes to be used. The thermometer incorporates a clear digital display with a precise read-out of temperature over the range of -59.9 to +1399°C with a 0.1°C resolution between -59.9 to +199.9°C thereafter 1°C.

The unit features a display hold function and both low battery and open circuit indication are also displayed, when applicable. An auto-power off facility turns the instrument off after four minutes, maximising battery life.

The MiniTherma K is lightweight, at less than 40 grams. The case is manufactured from high impact ABS plastic designed to cope with routine day-to-day applications. Each MiniTherma K is supplied as a kit with a penetration probe (133-161) and battery, all in a protective PVC zip wallet.

specification	MiniTherma K
range	-59.9 to +1399°C
resolution	0.1°C (1°C above +199.9°C)
accuracy	±1% or ±1°C over the full range
battery	3 volt CR2032 lithium coin cell
battery life	100 hours
sensor type	K thermocouple
display	custom LCD
dimensions	19 x 40 x 76mm
weight	36 grams

order code	description
810-990	MiniTherma K kit

plug-mounted probes

These plug-mounted probes are mounted directly into miniature type K thermocouple plugs. This provides an economical solution to many temperature measuring applications and allows the option of one-handed operation.

		order code
 penetration probe Ø3.3 x 120mm	This plug-mounted, stainless steel, penetration probe is strong and versatile. Ideal for a variety of applications i.e. liquids or semi-solids. Response time less than three seconds. Maximum tip temperature +250°C.	133-161
 fast response probe Ø1mm tip x 90mm	This plug-mounted, fast-response, penetration probe is designed for measuring the temperature of soft substances and liquids. Response time less than one second. Maximum tip temperature +250°C.	133-151
 air or gas probe Ø3.3 x 120mm	This plug-mounted air/gas probe has a perforated stainless steel tip for fast response. Ideal for measuring the temperature of air conditioning. Response time less than one second. Maximum tip temperature +250°C.	133-301
 ribbon surface probe Ø8 x 120mm	This plug-mounted stainless steel surface probe is ideal for measuring metallic surfaces. A right-angled version is also available, order code 133-046. Response time less than one second. Maximum tip temperature +250°C.	133-045
 FEP (plastic) probe Ø3.2 x 40mm	This FEP (plastic) penetration probe, for measuring food temperatures, was originally designed for airlines where safety is paramount. Response time less than three seconds. Maximum tip temperature +250°C.	133-155

catering thermometer kits

- ✓ choice of 0.1°C or 1°C resolution
- ✓ value-for-money - FREE log book, Probe-Wipes & carrying case

These thermometer and probe kits are designed for the food and catering industry. For a full specification on each thermometer see pages 12 and 14. Each kit is supplied in a useful ABS carrying case with a temperature log book, a tub of 70 Probe-Wipes, battery and a traceable certificate of calibration.

ETI 2001 catering kit 0.1°C or 1°C

Each kit contains

- 1 x 221-201 ETI 2001 thermometer
- 1 x 123-160 penetration probe
- 1 x 133-362 PTFE wire probe
- 1 x 831-100 temperature log book
- 1 x 836-022 mini tub of 70 Probe-Wipes
- 1 x 839-040 9 volt PP3 battery
- 1 x 834-100 ABS carrying case

order code	description
860-015	2001 thermometer kit <i>a traceable certificate of calibration is included</i>

ETI 2003 catering kit 1°C

Each kit contains

- 1 x 221-033 ETI 2003 thermometer
- 1 x 123-160 penetration probe
- 1 x 133-362 PTFE wire probe
- 1 x 831-100 temperature log book
- 1 x 836-022 mini tub of 70 Probe-Wipes
- 1 x 839-040 9 volt PP3 battery
- 1 x 834-100 ABS carrying case

order code	description
860-025	2003 thermometer kit <i>a traceable certificate of calibration is included</i>

Therma 20 catering kit 0.1°C

Each kit contains

- 1 x 226-020 Therma 20 thermometer
- 1 x 174-166 penetration probe
- 1 x 170-372 air wire probe
- 1 x 831-100 temperature log book
- 1 x 836-022 mini tub of 70 Probe-Wipes
- 1 x 839-040 9 volt PP3 battery
- 1 x 834-100 ABS carrying case

ThermaData™ logger

recording thermometers

- ✓ waterproof housing offering IP66/67 protection
- ✓ meets EN 12830, S & T , C & D, 1
- ✓ range -40 to +85°C or +125°C
- ✓ resolution 0.1°C, high accuracy $\pm 0.5^\circ\text{C}$

The ThermaData logger mk II series consists of a comprehensive range of portable data-loggers utilising the latest in electronic technology. The ThermaData loggers are housed in waterproof, ergonomic cases that are designed to meet IP66/67 protection.

The ThermaData logger mk II range offers the choice of either blind data-loggers or data-loggers with a LCD display. Other options include internal and external temperature sensors/probes. The remote temperature probes are supplied with a one metre PVC/PFA lead.

Each logger incorporates a red and green LED, the flashing green LED indicates that the logger is active/logging and the flashing red LED indicates that your customised pre-set alarms have been exceeded.

ThermaData logger Mk II software

The ThermaData logger is connected to a PC via a USB cradle. By clicking the relevant icon the data can be downloaded and displayed either as a graph, table or summary. The information can be analysed by zooming in, storing to disc or exporting as a text (.txt) file to other software packages.

The ThermaData logger software incorporates several useful functions, including the ability to display two traces on a graph, the trace colours are user selectable. All files can be viewed as thumbnail icons for easy identification. There are also options for customers requiring alternative languages.

The ThermaData logger software is backward compatible, therefore will work equally as well with the older style ThermaData loggers as well as the new mk II models. The software is both powerful and sophisticated, yet user-friendly enabling temperature data to be organised and analysed to provide management information. The software allows the user to programme the logging sample/interval rate (0.1 to 255 minutes), the real-time clock, °C or °F, delayed start (maximum 23 hours, 59 minutes) or select a magnetic start option. It is also possible to include a 32-character user ID for each logger.

By selecting continuous logging in the software options, it is possible to start the ThermaData logger only once and never have to reset its parameters again, even if downloaded regularly. Unlike most low cost loggers, the ThermaData logger will continue recording during and after downloading the data.

The ThermaData logger software is supplied with each USB cradle. Please note: when initially ordering loggers it is necessary to order at least one ThermaData logger cradle.

°C/°F

IP66/67

ThermaData logger - model TB

blind with an internal sensor

specification	model TB
range	-40 to +85°C
resolution	0.1°C
accuracy	±0.5°C
memory	4000 readings
sample rate	0.1 to 255 minutes
battery	3.6 volt ½ AA lithium
battery life	18 months
display	2 LEDs
dimensions	Ø76 x 23mm
weight	82 grams

ThermaData logger - model TDF

LCD with an external fixed sensor

specification	model TDF
range	-40 to +125°C
resolution	0.1°C
accuracy	±0.5°C
memory	4000 readings
sample rate	0.1 to 255 minutes
battery	3.6 volt ½ AA lithium
battery life	18 months
display	10mm LCD/2 LEDs
dimensions	Ø76 x 23mm
weight	102 grams

order code	description
296-101	model TDF

ThermaData logger - model TB1F

blind with an internal & external fixed sensor

specification	model TB1F
range	-40 to +85/125°C
resolution	0.1°C
accuracy	±0.5°C
memory	2 x 2000 readings
sample rate	0.1 to 255 minutes
battery	3.6 volt ½ AA lithium
battery life	18 months
display	2 LEDs
dimensions	Ø76 x 23mm
weight	94 grams

order code	description
295-011	model TB1F

ThermaData logger - model TD1F

LCD with an internal & external fixed sensor

specification	model TD1F
range	-30 to +85/125°C
resolution	0.1°C
accuracy	±0.5°C
memory	2 x 2000 readings
sample rate	0.1 to 255 minutes
battery	3.6 volt ½ AA lithium
battery life	18 months
display	10mm LCD/2 LEDs
dimensions	Ø76 x 23mm
weight	103 grams

order code	description
296-011	model TD1F

USB cradle, software & start magnet

The ThermaData logger cradle is supplied complete with the ThermaData logger PC software and a start magnet.

Each USB cradle is supplied with a one metre PVC lead.

order code	description
293-804	cradle, software & start magnet

ThermaData logger accessories

An optional protective silicone boot is available for the ThermaData loggers.

The ThermaData loggers are supplied with white seals but customers can purchase coloured seals, available in packs of seven colours: black, blue, brown, green, red, white and yellow.

order code	description
296-990	pack of seven coloured seals
830-270	protective silicone boot

ThermaData™ logger

blind recording thermometers

- ✓ blind recording thermometer & data-logger
- ✓ visual display of high & low alarm status
- ✓ range -40 to +85°C
- ✓ simple visual inspection shows if limits exceeded

The ThermaData logger is a cost effective, self-contained temperature data-logger or blind recording thermometer that is designed to record the temperature of the surrounding environment. The ThermaData logger is housed in a water-resistant polyethylene case and incorporates two LED status indicators.

The ThermaData logger software allows the user to programme the logging sample/interval rate (1 to 255 minutes), the real-time clock, °C or °F, delayed start (maximum 23 hours, 59 minutes) or push-button start and a 12-character user ID. The software also incorporates a password protected calibration adjustment feature that allows the user to check the calibration of loggers and make minor adjustments in 0.5°C increments (maximum ±3°C).

By selecting continuous logging in the software options, it is possible to start the ThermaData logger only once and never have to reset its parameters again, even if downloaded regularly. Unlike most low cost loggers, the ThermaData logger will continue recording during and after downloading the data.

The user can also set within the software, high and low alarm values for a specific application. A button push will allow a simple visual inspection of the unit to show if either of these limits has been exceeded. A flashing red LED will warn the user that the alarm limits have been exceeded (reject) or a flashing green LED will advise the user that the alarm limits have not been exceeded (accept).

ThermaData PC software

The ThermaData logger is connected to a PC via a serial or USB port lead. By clicking on the relevant icon the data can be downloaded and displayed either as a graph, table or summary. The information can then be analysed by zooming in, storing to disc or exporting to other software packages.

order code	description
293-001	ThermaData logger - blue
293-105	ThermaData logger - white
293-205	ThermaData logger - yellow
293-305	ThermaData logger - green
293-405	ThermaData logger - red
293-605	ThermaData logger - brown
293-701	ThermaData logger - black
293-101	software & RS232 serial lead
293-104	software & RS232 USB lead

colour-coded data-loggers

The ThermaData loggers are available in a variety of coloured cases; blue, white, yellow, green, red, brown and black. The colour-coded cases help to prevent cross-contamination by allowing the user to allocate a colour to a specific product or application. For example, in the food industry, green may be used for salads, blue for fish and red for raw meats etc.

Other applications include different coloured loggers for easy identification in, eg, the building and construction industry where loggers can often blend in with the environment.

specification	ThermaData logger
range	-40 to +85°C
resolution	0.5°C
accuracy	±1°C (±0.5°C with calibration utility)
memory	2,048 temperature readings
sample rate	1 minute to 255 minutes
battery	3.6 volt ½ AA lithium coin cell
battery life	minimum 3 years
dimensions	Ø55 x 25mm
weight	45 grams

ThermaData™ logger

humidity & temperature recording meter

- ✓ display toggles between humidity and temperature
- ✓ visual display of high & low alarm status
- ✓ records up to a maximum of 16,000 readings
- ✓ simple visual inspection shows if limits exceeded

The new humidity and temperature ThermaData loggers are portable data-loggers that measure and record both temperature and relative humidity (%rh) over the range of -20 to +85°C and 0 to 100 %rh.

At programmable intervals, the loggers will record simultaneously both temperature and humidity, recording up to a maximum of 16,000 readings (8,000 humidity and 8,000 temperature).

The ThermaData loggers offer the choice of either a blind logger (HTB) or a LCD display logger (HTD), both options include internal humidity and temperature sensors.

Each logger incorporates a red and green LED, the flashing green LED indicates that the logger is active/logging and the flashing red LED indicates that your customised pre-set alarms have been exceeded.

The humidity and temperature ThermaData loggers are suitable for a diverse range of applications which include food storage and QA monitoring.

ThermaData logger software

The ThermaData logger is connected to a PC via a USB cradle. By clicking the relevant icon, the data can be downloaded and displayed either as a graph, table or summary. The information can be analysed by zooming in, storing to disc or exporting in Excel (.xls) or as a text (.txt) file to other software packages.

Please note: when initially ordering loggers it is necessary to order at least one ThermaData logger cradle.

specification	temperature	humidity
range	-20 to +85°C	0 to 100 %rh
resolution	0.1°C	0.1 %rh
accuracy	±0.5°C (0 to +45°C) ±1°C (-20 to +70°C) ±1.5°C (+70 to +85°C)	±2 %rh @ +25°C (10 to 90 %rh)
hysteresis	n/a	±1 %rh

IR-Chill

infrared thermometer

- ✓ instant reading of chilled or frozen foods
- ✓ records maximum & minimum readings
- ✓ minimal ambient effect in cold environments
- ✓ compact, pocket-sized & simple to use

The IR-Chill thermometer is designed to measure the temperature of chill cabinets, freezers and cold storage units. Simply aim the thermometer at the target and press the measurement button to display the surface temperature instantly, with little ambient effect. The IR-Chill indicates temperature over the range of -9.9 to +219.9°C with a resolution of 0.1°C. Each unit incorporates maximum and minimum temperature functions together with an auto power off facility that automatically turns the instrument off after 15 seconds, maximising battery life. A lock function is included for continuous temperature measurement, this is particularly useful when scanning a number of products in chill cabinets. The distance to target ratio is 1:1 therefore the thermometer should be positioned as close to the target as possible. The default emissivity is 0.95 but is adjustable from 0.01 to 1, so you can point and measure just about any surface.

The IR-Chill is perfect for supermarkets, food processors and general purpose applications. Whilst the IR-Chill is cheaper than many infrared gun-type thermometers, it out-performs most in low temperature applications.

why use an IR-Chill thermometer?

The accuracy of electronic infrared (IR) thermometers is often affected by the temperature of the environment in which they are being used. Large changes in the ambient temperature can introduce errors in the readings of the IR thermometer. When an IR thermometer is first taken into a refrigerated space, the readings may be as much as five or six degrees different. If the IR thermometer is allowed to acclimatise to the new ambient temperature before being used, it will provide fairly accurate readings.

Most IR thermometers are fitted with a lens to focus energy on the IR sensor. Many use a Fresnel lens made of plastic materials. These are particularly susceptible to thermal shock. Some IR thermometers use a Mica lens, these are less susceptible to thermal shock but will still display an error of a few degrees.

The IR-Chill is designed to be used only a few inches from the surface being measured, so the lens is eliminated completely. The electronics incorporate an accurate temperature compensation circuit to minimise thermal drift. Therefore, the IR-Chill gives maximum reading accuracy in changing ambient temperatures. This means that you can come and go between cold and warm environments and take accurate temperatures on the move.

specification	IR-Chill
range	-9.9 to +219.9°C
resolution	0.1°C (-9.9 to +199.9°C) otherwise 1°C
accuracy	±1°C (0 to +64.9°C) otherwise ±1.5%
field of view	target ratio 1:1
emissivity	0.95 default - adjustable 0.01 to 1 emissivity
battery	3 volt CR2032 lithium coin cell
battery life	40 hours
display	custom LCD
dimensions	37 x 40 x 113mm
weight	40 grams

order code	description
814-090	IR-Chill thermometer

TN1 - infrared thermometer

- ✓ compact non-contact thermometer
- ✓ 0.95 default emissivity - adjustable

The TN1 is a non-contact infrared thermometer. Simply aim the thermometer at the target and press the measurement button to display the surface temperature instantly. The TN1 indicates temperature over the range of -33 to +220°C with a resolution of 0.1°C and is switchable between °C/°F.

Each unit incorporates maximum and minimum temperature functions together with an auto power off facility that automatically turns the instrument off after 15 seconds, maximising battery life and a lock function for continuous temperature measurement. The distance to target ratio is 1:1 therefore the thermometer should be positioned as close to the target as possible. The default emissivity is 0.95 but can be changed from 0.01 to 1.

specification	TN1
range	-33 to +220°C
resolution	0.1°C or °F (switchable)
infrared accuracy	±2% of reading or ±2°C whichever is greater
field of view	target ratio 1:1
emissivity	0.95 default - adjustable 0.01 to 1 emissivity
battery	3 volt CR2032 lithium coin cell
battery life	40 hours continuous use
display	custom LCD
dimensions	18 x 37 x 68mm
weight	32 grams

order code	description
814-050	TN1 infrared thermometer

TN2 - infrared thermometer

- ✓ including laser alignment
- ✓ 0.95 default emissivity - adjustable

The TN2 infrared thermometer incorporates laser alignment. Simply aim the TN2 at the target and press the read button to display the surface temperature instantly over the range of -33 to +250°C with a resolution of 0.1°C/°F (switchable).

The distance to target ratio is 6:1 and therefore the thermometer should be positioned as close to the target as practical without touching. The minimum target size is Ø25mm for accurate temperature measurement.

specification	TN2
range	-33 to +250°C
resolution	0.1°C or °F (switchable)
infrared accuracy	±2% of reading or ±2°C whichever is greater
field of view	target ratio 6:1
emissivity	0.95 default - adjustable 0.01 to 1 emissivity
battery	3 volt CR2032 lithium coin cell
battery life	40 hours continuous use
display	custom LCD
dimensions	18 x 50 x 100mm
weight	62 grams

order code	description
814-055	TN2 infrared thermometer

RayTemp™ 3

infrared thermometer

- ✓ simple push button operation
- ✓ range -59.9 to +499.9°C
- ✓ assured accuracy of ±1°C over the range of 0 to +65°C
- ✓ ideal instrument for catering & food processing

The RayTemp 3 infrared thermometer is compact, lightweight and easy to use. Simply aim, pull the trigger and display the temperature of the item being measured. In addition the LCD will display the maximum temperature.

The RayTemp 3 measures temperature over the range of -59.9 to +499.9°C with an assured accuracy of ±1°C over the range of 0 to +65°C, outside of this range ±2°C of reading in an ambient temperature of between +15°C and +25°C, with a repeatability of ±1°C of reading.

The instrument incorporates a clear, easy to read, LCD display with low battery, laser and backlight indication and an auto power off facility that turns the instrument off after 15 seconds, maximising battery life. The RayTemp 3 is ideal for measuring food surface temperatures, eliminating the need to touch or contaminate the food you are measuring, avoiding the risk of cross-contamination. The unit can be used by anyone as there is no need to focus or adjust the instrument.

Each RayTemp 3 features a single push button, allowing the user to select °C or °F. The thermometer also incorporates laser assisted alignment as standard, to assist in pin-pointing the area of measurement. The unit incorporates an 11:1 optic ratio (target distance/diameter ratio) and a fixed emissivity of 0.97 making it more suitable for chilled and frozen foods, although this infrared thermometer can be used for a wide range of other applications.

optional accessories

The protective PVC pouch helps to protect the instrument against accidental damage. A hard ABS carrying case is also available, ideal for transporting the thermometer safely. The pouch and carrying case can also be used for the RayTemp 4 and 8.

The Comparator provides an inexpensive way of checking the temperature of infrared thermometers when used in conjunction with a Reference thermometer (see page 87).

specification	RayTemp 3
range	-59.9 to +499.9°C
resolution	0.1°C or °F (-9.9 to +199.9°C) otherwise 1°C
infrared accuracy	±1°C (0 to +65°C) otherwise ±2°C
field of view	target ratio 11:1
emissivity	0.97 fixed
battery	2 x AAA alkaline
battery life	140 hours continuous use
display	custom LCD
dimensions	39 x 72 x 175mm
weight	180 grams

order code	description
814-040	RayTemp 3 thermometer
830-040	protective PVC pouch
834-740	small hard carrying case
814-132	aluminium Comparator

Combo

infrared & foldaway probe thermometer

- ✓ two instruments in one
- ✓ 0.1°C resolution
- ✓ range - 32.9 to +219.9°C
- ✓ simple to use

The Combo is two instruments in one compact unit - a digital infrared non-contact thermometer and a traditional probe thermometer that incorporates a foldaway penetration probe. Each unit incorporates an auto power off facility that automatically turns the instrument off after 15 seconds, maximising battery life plus a lock function for continuous temperature measurement.

infrared thermometer

Simply aim the infrared thermometer at the target and press the measurement button to display the surface temperature over the range of -32.9 to +219.9°C with a resolution of 0.1°C/°F.

The Combo IR thermometer incorporates a max/min temperature function. The distance to target ratio is 5:1 and therefore the thermometer should be positioned as close to the target as possible. The default emissivity is 0.95 but can be changed from 0.01 to 1, if required.

foldaway probe thermometer

Alternatively, it is possible to take liquid or semi-solid product temperatures, using the Combo's stainless steel penetration probe (Ø3.3 x 120mm). The probe conveniently folds back through 180 degrees into the side of the instrument when not in use.

optional accessories

The protective wallet or zip pouch, both with belt loops, help to protect the instrument against accidental damage. The black acrylic wall bracket stores the instrument safely (screws not supplied).

specification	Combo
range	-32.9 to +219.9°C
resolution	0.1°C or °F (switchable)
infrared accuracy	±2% of reading or ±2°C whichever is greater
probe accuracy	±1% of reading or ±1°C whichever is greater
field of view	target ratio 5:1
emissivity	0.95 default - adjustable 0.01 to 1 emissivity
battery	3 volt CR2032 lithium coin cell
battery life	40 hours continuous use

832-200	wall bracket

EcoTemp™ max/min thermometer

- ✓ detachable penetration probe
- ✓ max/min, hold & °C/°F functions

The EcoTemp digital thermometer features a large, easy to read, LCD display with display hold and max/min memory functions. The unit measures temperature over the range of -49.9 to +199.9°C with a 0.1°C/°F resolution. Both open circuit and low battery indication are displayed, when applicable.

This thermometer is ideal for monitoring cooking, cooling and food holding temperatures as part of HACCP, due diligence and health and safety procedures.

Each EcoTemp thermometer is supplied with a detachable, rigid, stainless steel food penetration probe (Ø3.5 x 125mm) with a Ø3.2 x 750mm silicone connecting lead. Optional, alternative probes are available.

display	custom 22mm LCD
dimensions	20 x 58 x 165mm
weight	115 grams including probe

ThermaLite™ pocket-sized thermometer

- ✓ simple one-handed operation
- ✓ supplied with probe cover & wall bracket

The ThermaLite digital thermometer is a truly pocket-sized thermometer measuring less than 185mm overall and weighing less than 50 grams including battery, probe and cover. Despite its modest size, the ThermaLite thermometer incorporates a clear LCD display. The thermometer displays temperature over the range of -49.9 to +149.9°C with a 0.1°C resolution and an accuracy of better than ±1°C.

truly pocket-sized

The instrument incorporates a simple on/off push button and an auto power off facility that turns the instrument off automatically after 10 minutes, maximising battery life. The unit is housed in a high impact ABS plastic, designed to cope with routine day-to-day food and catering applications. The pointed, Ø3.3 x 44mm stainless steel penetration probe is ideal for measuring the temperature of food and semi-solid materials.

specification	ThermaLite
range	-49.9 to +149.9°C
resolution	0.1°C
accuracy	±1°C
battery	3 volt CR2032 lithium coin cell
battery life	5,000 hours
sensor type	thermistor
display	8mm LCD
dimensions	17 x 28 x 185mm
weight	47 grams

a traceable certificate of calibration is included

order code	description
226-010	ThermaLite thermometer

Gourmet

folding probe thermometer

- ✓ water resistant pocket-sized instrument
- ✓ 8,000 hours continuous battery use

The water resistant Gourmet folding probe thermometer (FPT) is an easy to use instrument, ideal for monitoring cooking, cooling and food holding temperatures as part of HACCP and health and safety procedures. The unit measures temperature over the range of -49.9 to +149.9°C with a 0.1°C resolution and incorporates two push button switches, max/min and on/off.

The Gourmet's battery will last up to 8,000 hours continuous use or, if used two hours a day, seven days a week, for a minimum of 10 years. Each unit incorporates a stainless steel, food penetration probe (Ø3.5 x 110mm) that conveniently folds back into the side of the instrument when not in use, rotating through 180 degrees, allowing the user to transport the instrument safely.

A protective wallet and zip pouch, both with a belt loop, are available.

order code	description
810-730	Gourmet FPT thermometer
830-110	protective wallet
830-001	zip pouch

specification	Gourmet FPT
range	-49.9 to +149.9°C
resolution	0.1°C or 0.1°F (switchable)
accuracy	±1°C
battery	1.5 volt AAA
battery life	8,000 hours
sensor type	thermistor
display	15mm LCD
dimensions	19 x 52 x 155mm
weight	76 grams

Multi-function

thermometer

- ✓ displays both the temperature & alarm set temperature
- ✓ supplied complete with stainless steel penetration probe

This low cost digital Multi-function thermometer is compact and easy to use. The thermometer features an easy to read LCD that displays both the temperature and the alarm set temperatures, ideal for restaurants, bars and cafes as an economical solution for temperature measurement applications.

The thermometer incorporates a display hold facility and a max/min memory function together with an adjustable audible high/low temperature alarm. The unit indicates temperature over the range of -49.9 to +149.9°C with a 0.1°C or 0.1°F resolution.

The rear of the case incorporates a useful foldaway worktop stand, a pocket clip and a probe storage clip. Each unit is supplied with a pointed, stainless steel, penetration probe (Ø3.3 x 125mm) with a one metre PVC connecting lead and probe cover.

order code	description

ThermaGuard™ telephone & power warning system

- ✓ monitoring temperature - range -19.9 to +49.9°C
- ✓ stores four emergency telephone numbers

The ThermaGuard continuously monitors the temperature and the power status and reports to the user, via a telephone call, if the alarm settings have been activated. Alternatively, it is possible to telephone the ThermaGuard and it will report the current, the max/min temperatures and the power status. Each unit is supplied with a small thermistor sensor with 10 metres of PVC lead. The ThermaGuard monitors temperature over the range of -19.9 to +49.9°C with a resolution of 0.1°C or 0.1°F. The unit's custom LCD indicates the real date/time, the current temperature, the max/min temperature since last reset (24-hours, seven days or manual) and the current power status.

The ThermaGuard can store up to four, 20-digit telephone numbers in its memory and will dial up sequentially each stored emergency number (three times) or until someone answers the call and enters the 4-digit PIN code. The system incorporates a number of programmable features including the ability to enter a ten second personal identification message, a user PIN code, high and low alarm temperatures and an alarm time delay feature to help avoid false alarms. Each ThermaGuard incorporates a four-hour battery back-up power supply for emergency use when the power failure alarm is activated. The ThermaGuard is ideal for 24/7 monitoring of temperature sensitive equipment and storage areas.

specification	ThermaGuard
range	-19.9 to +49.9°C
resolution	0.1°C or 0.1°F (programmable)
accuracy	±2°C ±1 digit
power	230/115 volt AC/DC transformer
sensor type	thermistor
display	custom LCD
dimensions	40 x 108 x 165mm
weight	476 grams

fridge or freezer thermometers

Ø52mm dial thermometer

This easy to read fridge or freezer thermometer has a Ø52mm dial, indicating temperature over a range of -30 to +30°C in 1°C divisions and incorporates colour-coded zones. The ABS case incorporates a plastic hook to hang from a shelf.

order code	description
800-100	Ø52mm dial thermometer

Ø70mm dial thermometer

This fridge or freezer thermometer has a Ø70mm dial, indicating temperature over a range of -30 to +30°C in 1°C divisions and incorporates colour-coded zones. The ABS case measures 70 x 60mm. The thermometer can be free-standing or hung from a shelf.

order code	description
800-000	Ø70mm dial thermometer

Ø50mm dial thermometer

This stainless steel, fridge or freezer thermometer has a Ø50mm dial, indicating temperature over a range of -30 to +30°C. The housing measures 60 x 70mm and can be free-standing or hung from a shelf.

order code	description
800-923	Ø50mm dial thermometer

vertical spirit-filled thermometer

This spirit-filled vertical fridge/freezer thermometer features clearly marked colour-coded zones for ease of reading.

The thermometer indicates temperature over the range of -30 to +40°C in 1°C divisions.

The ABS case measures 150 x 24mm and incorporates a plastic hook to hang from a shelf.

order code	description
803-000	vertical spirit-filled thermometer

horizontal spirit-filled thermometer

This spirit-filled fridge/freezer thermometer indicates temperature over a range of -30 to +40°C in 1°C divisions with colour-coded zones. The ABS housing measures 130 x 53mm. The thermometer can be free-standing or hung from a shelf.

order code	description
803-050	horizontal spirit-filled thermometer

clear spirit-filled thermometer

This spirit-filled fridge/freezer thermometer is encased in a clear ABS housing (10 x 30 x 122mm). The thermometer's colour-coded zones indicate temperature over a range of -40 to +20°C/°F. The unit is designed to be hung from a shelf or wall-mounted (brackets supplied).

order code	description
803-925	clear spirit-filled thermometer

fridge or freezer alarm thermometers

max/min temperature memory

This max/min and alarm fridge or freezer thermometer features a large LCD display, indicating the temperature over the range of -49.9 to +69.9°C.

The thermometer is housed in an ABS case and incorporates a backlight, two temperature sensors, a remote probe with a one metre PVC lead for the appliance temperature, and an internal sensor for the air room temperature.

specification	max/min alarm thermometer
range	-49.9 to +69.9°C
resolution	0.1°C
accuracy	±1°C
battery	1.5 volt AAA
battery life	5,000 hours

fridge & freezer dual sensor alarm thermometer

This versatile fridge and freezer alarm thermometer enables the user to monitor the temperature of two appliances simultaneously. The thermometer displays temperature over the range of -39.9 to +69.9°C with a 0.1°C resolution and an accuracy of ±1°C.

The thermometer features a visual and audible programmable alarm indicating when the temperature is outside the set limits (default +8°C fridge and -18°C freezer). The alarm feature also incorporates a count-up time function which records the length of time, up to 99 hours and 59 minutes, that the fridge or freezer thermometer has exceeded the limits. The unit also incorporates a max/min memory function.

Each thermometer is housed in an ABS case and incorporates two magnetic pads for appliance mounting. The unit is powered by two AAA batteries with a life expectancy of 5,000 hours. Each alarm thermometer is supplied with two remote temperature probes, both with a one metre PVC lead.

specification	alarm thermometer
range	-39.9 to +69.9°C

waterproof fridge thermometers

These small digital waterproof fridge thermometers are available in a variety of colours, white, yellow, lime green, raspberry red, sky blue or burnt orange.

The fridge thermometers indicate temperature over the range of -9.9 to +49.9 °C with a 0.1°C resolution.

The clear suction pad's pivotal ball enables the unit to be attached to a fridge from the back or front. Each unit measures 15 x 41 x 55mm (excluding suction pad).

These fridge thermometers can be part of your HACCP and due diligence procedures, being used for different food types or storage areas, reducing the risk of cross-contamination. Alternatively, each fridge, or area within a fridge, can be given a different colour thermometer to aid identification.

specification	fridge thermometers
range	-9.9 to +49.9°C
resolution	0.1°C
accuracy	±1.5°C over full range
battery	1.5 volt LR44 button cell
battery life	8,000 hours continuous use
display	custom LCD
dimensions	15 x 41 x 55mm
weight	35 grams

FoodSafe fridge food simulant thermometer

Most traditional temperature measuring devices in fridges only measure the air temperature. This is a major problem because cold air is heavier than warm air and therefore "drops out of the fridge" the moment the door is opened.

why a FoodSafe thermometer?

The FoodSafe food simulant thermometer, on the other hand, is an encased thermometer that ensures that it indicates temperature similar to that of the food stored in the fridge or chill cabinet. Therefore it is not subject to the changes in air temperature that normally occur when the door is opened. It is the temperature of the food that is important in preventing the growth of food poisoning bacteria.

The easy to read FoodSafe is ideal for domestic or commercial use, as it is reliable, robust and hygienic. The thermometer indicates temperature over the range of -20 to +40°C with an accuracy of ±0.5°C over the range of -5 to +20°C, 1°C thereafter. The unit is housed in a clear plastic case with colour-coded zones that indicate when the temperature is too warm. The FoodSafe thermometer measures Ø25mm x 150mm high.

Each FoodSafe thermometer is supplied with a metal hook for hanging in a fridge.

order code	description
803-900	FoodSafe food simulant thermometer

oven & microwave thermometers

dial oven thermometer

This stainless steel oven thermometer features a clear Ø55mm dial with colour-coded zones. The green marker indicates the minimum temperature that heated display units should be kept at. The thermometer indicates temperature over the range of 0 to +300°C in 10°C divisions. The case measures 45 x 65 x 80mm.

The unit can be free-standing or hung from a shelf and should be positioned in the middle of the oven for the most accurate temperature reading.

order code	description
800-809	Ø55mm dial oven thermometer

dial oven thermometer

This stainless steel oven thermometer features a Ø45mm dial with colour-coded zones. The green marker indicates the minimum temperature that heated display units should be kept at. The unit indicates temperature over the range of +50 to +300°C in 10°C divisions. The case measures 40 x 60 x 70mm.

The thermometer can be free-standing or hung from a shelf and should be positioned in the middle of the oven for the most accurate temperature reading.

order code	description
800-931	Ø45mm dial oven thermometer

microwave thermometer

This easy to use, spirit-filled, microwave thermometer is housed in a high impact plastic case.

The thermometer indicates temperature over the range of +30 to +110°C or +100 to 230°F.

The microwave thermometer is supplied with a plastic skewer for insertion into food before placing the thermometer in the space provided.

order code	description
803-670	microwave thermometer

horizontal oven thermometer

This stainless steel, spirit-filled, oven thermometer indicates temperature over the range of ambient to +275°C in 10°C increments. The thermometer's case measures 35 x 60 x 125mm.

The horizontal oven thermometer can be free-standing or hung from a shelf and should be positioned in the middle of the oven for the most accurate temperature reading.

order code	description
800-941	horizontal oven thermometer

oven thermometer & timer

- ✓ dual display - temperature & countdown timer
- ✓ high temperature detachable probe

The combined clock, countdown timer and thermometer displays both the actual and the alarm temperature over the range of 0 to +300°C and simultaneously the countdown or the actual time.

The timer will count down or up from/to 23 hours, 59 minutes and 59 seconds and the real time clock will display the time in either a 12 or 24-hour format.

The oven thermometer features an audible high alarm that can be set from the simple to use seven-button keypad. The alarm temperature is continuously displayed. The unit is designed to sit on a worktop or can be attached to an appliance via the magnetic pads at the rear of the instrument.

The thermometer is supplied with a high temperature probe and a two metre stainless steel braided lead. The probe has an insertion length of 150mm (Ø4mm) and incorporates a reduced diameter tip to aid response time.

specification	oven thermometer & timer
range	0 to +300°C
resolution	1°C or 1°F (switchable)
accuracy	±2°C (0 to +200°C)
battery	1.5 volt AAA
battery life	5,000 hours
sensor type	thermistor
display	triple custom LCD
dimensions	21 x 75 x 128mm
weight	89 grams

timers

count-up/down & countdown

count-up/down timers

These digital countdown/count up timers incorporate a louder than average audible alarm.

The timers are fully programmable via three, easy to use push buttons, allowing the user to set the time up to 99 minutes and 59 seconds or 19 hours and 59 minutes. The timers are powered by a single AAA battery.

Each timer incorporates a pocket clip/foot stand.

order code	description
806-100	minutes & seconds timer
806-110	hours & minutes timer

waterproof countdown timer

This countdown timer offers IP65 waterproof protection.

The large digital display and loud audible alarm, with variable volume control, is ideal in busy professional kitchens. The countdown timer is programmable via the keypad, allowing the user to set times up to 99 hours, 99 minutes and 99 seconds.

The timer incorporates magnetic pads and a keyhole slot for wall-mounting or attaching to an appliance. The unit is powered by a single AAA battery.

order code	description
806-150	waterproof countdown timer

cooking thermometers

meat roasting thermometer

The meat roasting thermometer incorporates a Ø45mm dial with a pointed Ø4 x 105mm, stainless steel stem. The thermometer indicates temperature over the range of 0 to +120°C in 1°C divisions. For the most accurate temperature recording, insert the thermometer in the thickest part of the meat or poultry. The dial is clearly marked for beef, lamb, veal, pork and poultry.

order code	description
800-804	meat roasting thermometer

frying thermometer

The frying thermometer incorporates a Ø50mm dial and a pointed, stainless steel Ø4 x 150mm stem. The frying thermometer indicates temperature over the range of 0 to +300°C in 10°C divisions. For the most accurate temperature recording, insert the thermometer in the thickest part of the product. The dial is clearly marked for meat, poultry, fish and chips.

order code	description
800-805	frying thermometer

cook's thermometer

The cook's thermometer indicates temperature over the range of +40 to +200°C in 2°C divisions. The thermometer's scale is clearly marked for hard crack, soft crack, hard ball, soft ball, thread and deep fry.

The thermometer's stainless steel casing incorporates a retaining clip and measures 50 x 240mm plus 65mm plastic handle.

Simply insert the thermometer into the liquid being measured and read the temperature.

order code	description
800-806	cook's thermometer

brass sugar & jam thermometer

The traditional brass sugar and jam thermometer indicates temperature over the range of +40 to +200°C in 2°C divisions. The thermometer's brass casing measures 47 x 200mm plus a 40mm copper handle.

The thermometer's scale is clearly marked for caramel, crack, hard ball, soft ball, jam and sterilise.

Simply insert the thermometer into the liquid being measured to the level indicated and read the temperature.

order code	description
800-808	brass sugar & jam thermometer

milk thermometers

The milk dial thermometers incorporate colour-coded zones that make them fast and simple to use. Available with Ø25mm dial x 125mm stem or Ø45mm dial x 125mm or 175mm stem, all supplied with a stainless steel jug mounting probe clip.

order code	description

zip pouches

These protective zip pouches are ideal for transporting thermometers and probes. The zip pouches are manufactured from soft PVC imitation leather.

The small zip pouch measures 35 x 65 x 170mm and the large zip pouch measures 40 x 110 x 300mm.

order code	description
830-001	zip pouch - small
830-002	zip pouch - large

batteries

rechargeable & standard

rechargeable batteries & charger

This range of rechargeable batteries is economical and ecological. These rechargeable batteries can be charged up to 1,000 times and have a long life compared to standard alkaline batteries.

The charger has the capacity to charge either two or four AAA or AA batteries (recommended in pairs). Alternatively, one or two PP3 batteries can be charged. The charger is not a fast charger which prolongs the life of the batteries.

order code	description
839-300	AA rechargeable batteries x 2
839-310	AAA rechargeable batteries x 2
839-320	PP3 rechargeable battery
839-350	battery charger

alkaline, standard & button cell batteries

For the convenience of our customers, ETI supplies a selection of eco-friendly (green), high performance, alkaline batteries to fit our thermometers. Button cell batteries are also available.

order code	description	
839-040	PP3 alkaline	9 volt
